Fall & Winter Felt Ornaments

There is just something about ornaments and decorations that are made from felt. Felt feels warm, nostalgic, and homie. My favorite tree ornaments are felt dolls that are hand embroidered and bedazzled with sequins. One of my closest friends even made felt stockings for my twins. It just doesn't seem quite like Christmas without those things. So clearly I like the look and feel of felt, so let's use some.

Today's project is to make a felt penguin ornament. I will be hand sewing the parts together, but you can also sew it on a machine, or use glue to attach the parts together.

Felt is so versatile and easy to use it's for beginners to start using and experienced crafters to improve and stretch their skills with more embellishments.

This free pattern download includes patterns for: penguin, tree, mitten, snowman, pumpkin and leaves. They are available in PDF format for hand cutting and SVG format for machine cutting.
