

Make it a Unicorn!

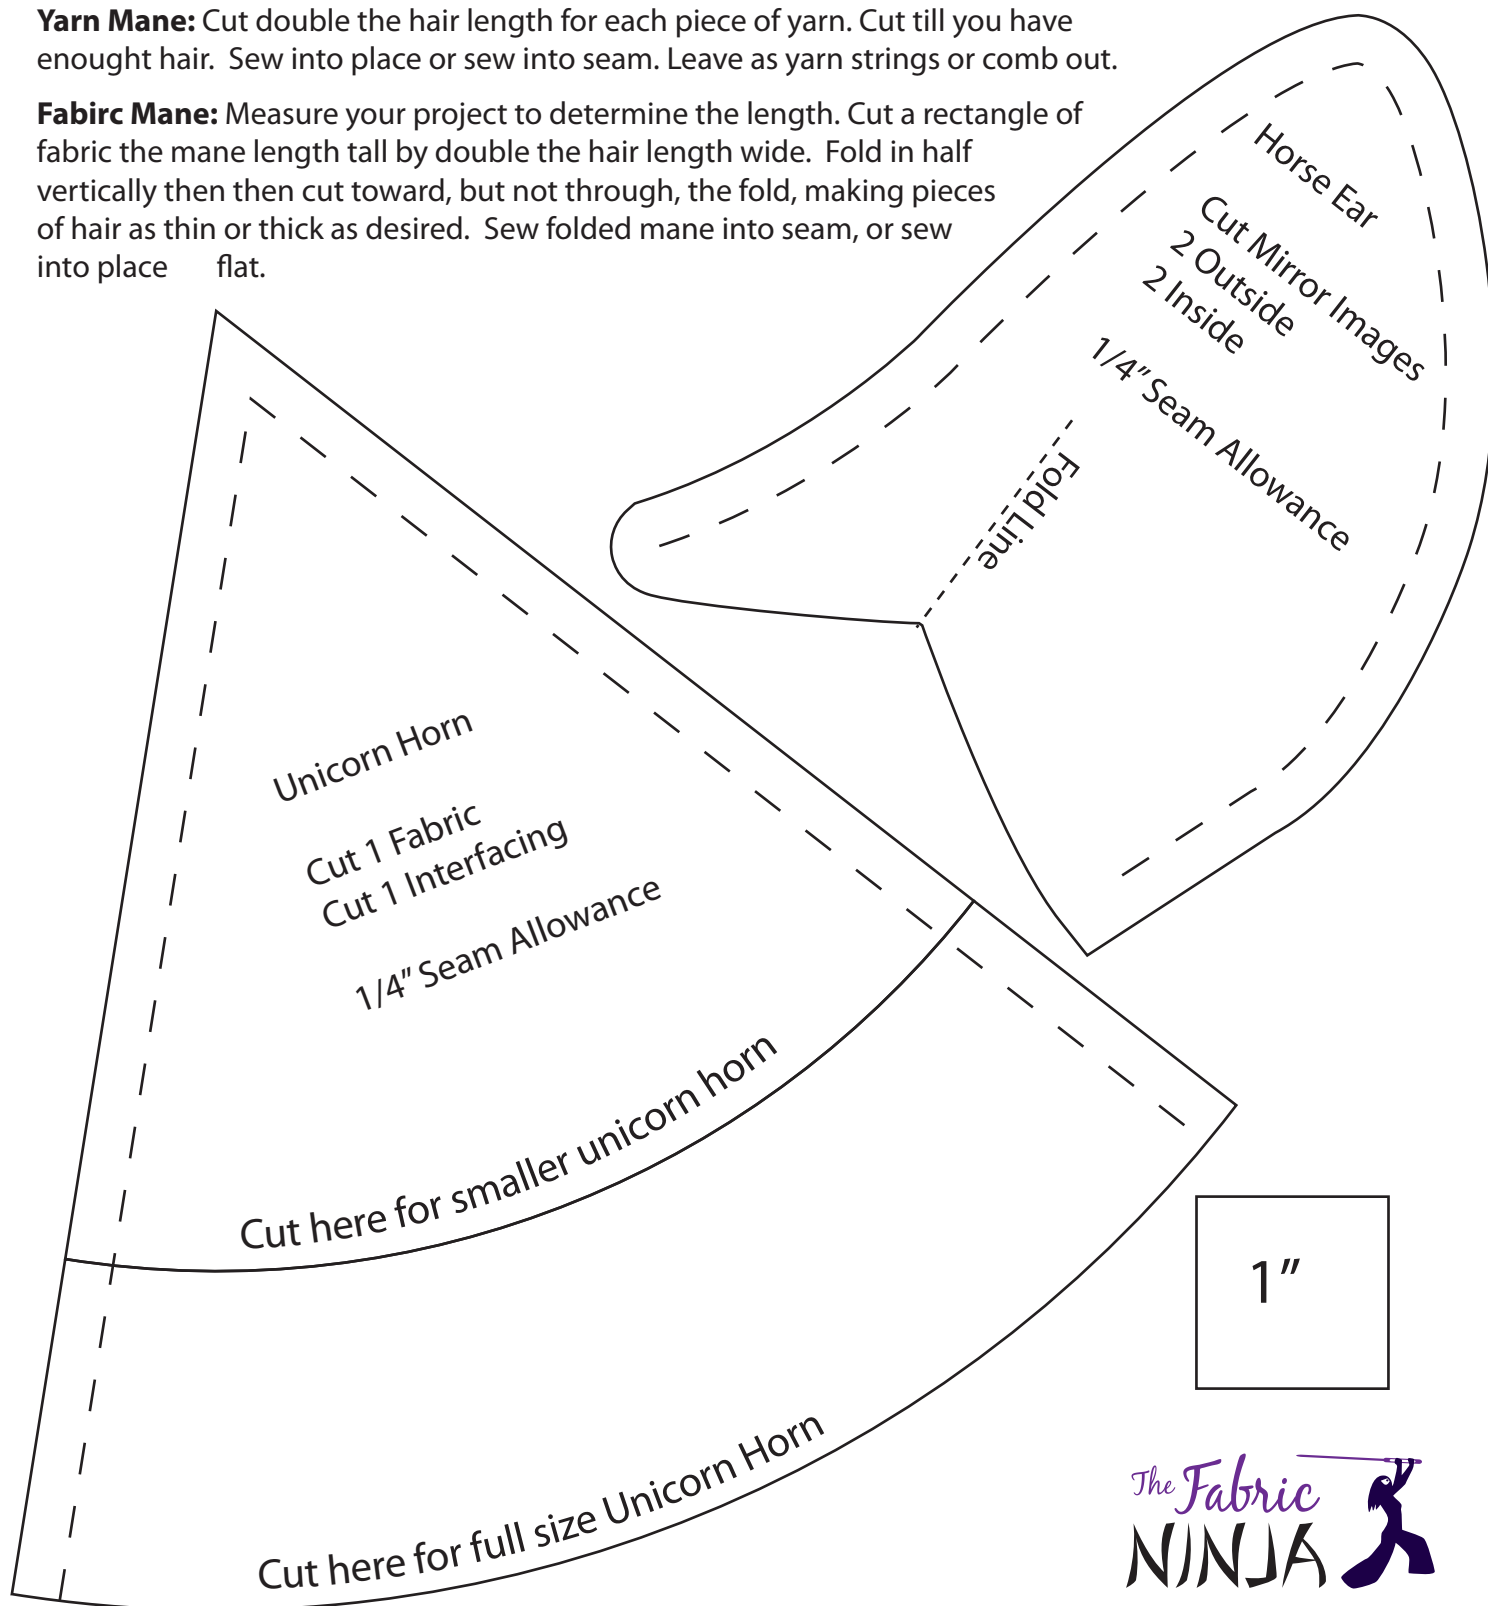

Fabric Ninja Patterns

Ears: Sew each ear right sides together, outside to inside, along dotted line. Flip right side out. Fold on vertical line and pin. Insert into project, sink ear deeper into seam to make smaller. Check placement before sewing.

Horn: Cut from interfaced fabric. Sew a gathering stitch along the bottom curve. Fold in half, right-sides together, and sew along straight edge. Clip point and flip right-side out. Stuff. Gather bottom to close. Decorate with a swirl of string or thread. Hand sew onto project or use snaps.

Yarn Mane: Cut double the hair length for each piece of yarn. Cut till you have enough hair. Sew into place or sew into seam. Leave as yarn strings or comb out.

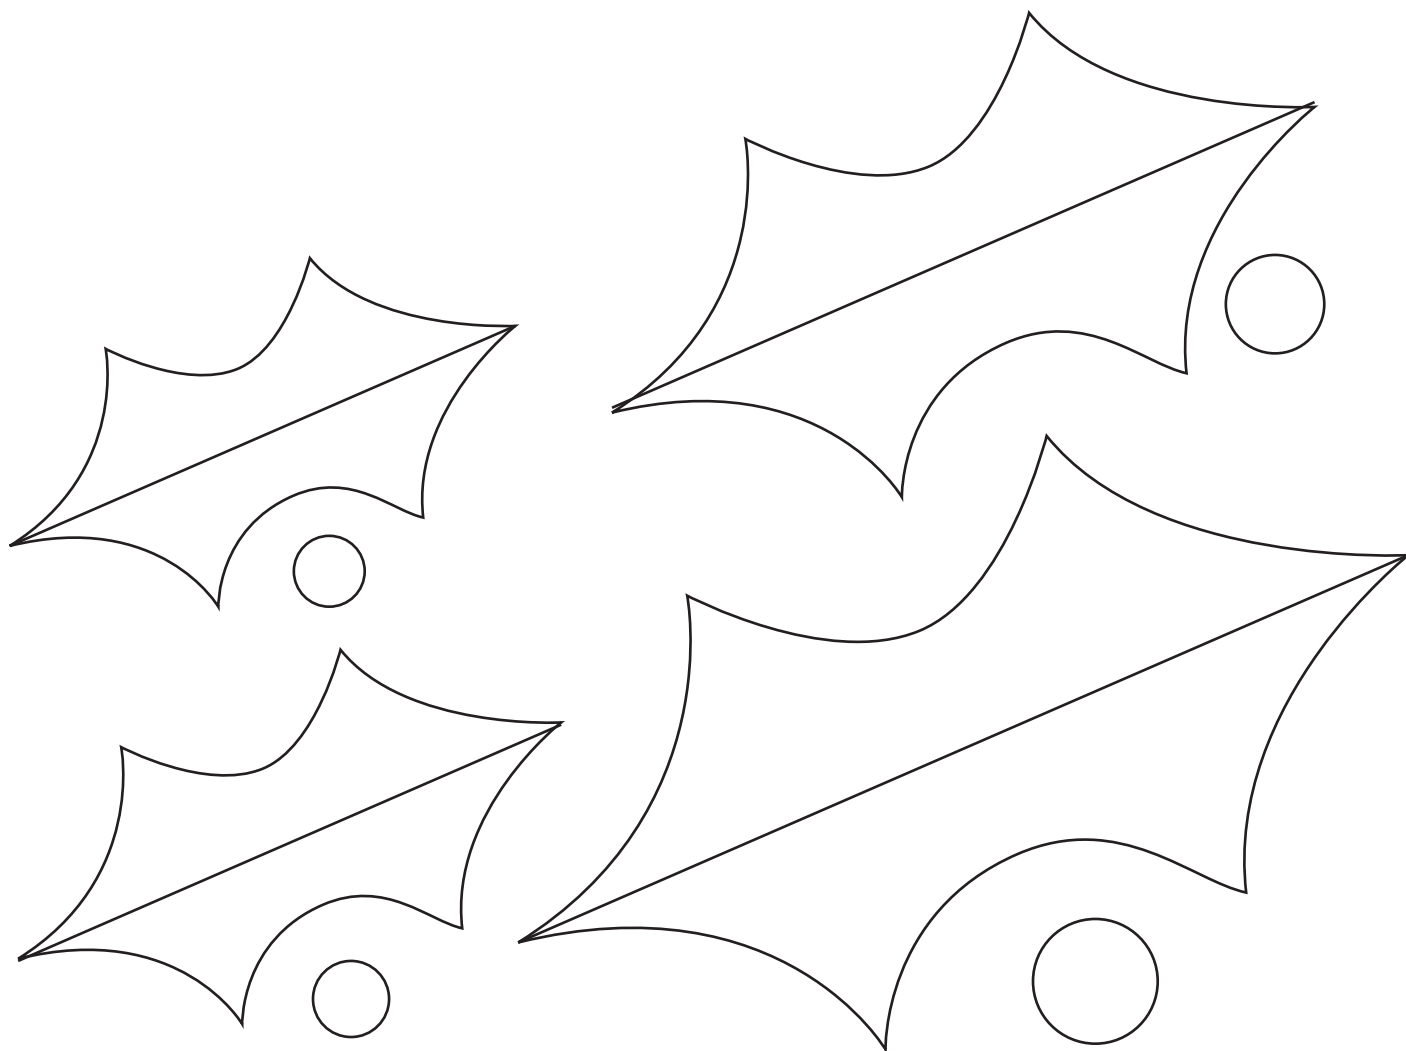

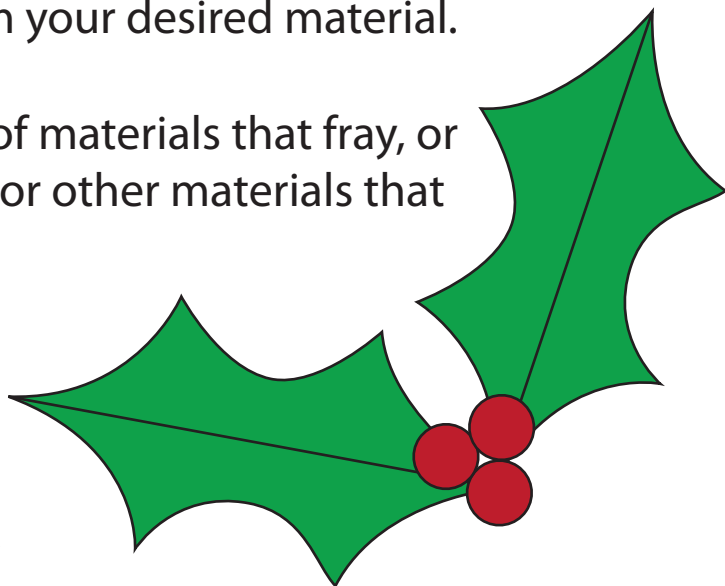

Fabric Mane: Measure your project to determine the length. Cut a rectangle of fabric the mane length tall by double the hair length wide. Fold in half vertically then cut toward, but not through, the fold, making pieces of hair as thin or thick as desired. Sew folded mane into seam, or sew into place flat.

Pick the holly and berry template which is the right size for your project. Cut 2 or 3 leaves and 3 berries from your desired material.

Applique (sew) around the edges of materials that fray, or simply tack in place if using fleece or other materials that do not fray.

Heat transfer vinyl can also be used, check out my website (FabricNinja.com) for the SVG cut files if you have a cutting machine, like a cricut.

Dino Spikes

Fabric Ninja Patterns

Great for use on hats, hoodies, babywearing hoods, and costume headpieces.

Vary the size for a more natural look or sink them deeper into the seam to give even more size variation. .

Use one at a time or use them in pairs next to each other like a Stegosaurus

Cut 2 Fabric & Cut 1 or 2 Interfacing

Seam Allowance Sides: 1/4"

Bottom: 1/2" for attachment ease
